

Cystoscopy Post Procedure Instructions

- For the first 24 hours a temporary burning sensation may occur when urinating, and/or the urine may be blood tinged - this is normal
- Drink at least 6 – 8 glasses of fluids (water, juices) for the first 3 days after your procedure
- For 24 hours, avoid alcohol and wines. Tea and coffee may be taken but in small quantities only.
- A warm tub bath may ease the burning sensation
- No hot tubs/whirlpools baths for 24 hours
- Contact your physician if bleeding increases or continues longer than 24 hours, or if you develop a fever or chills
- Go to the Emergency Department, if unable to contact your doctor
- Your referring doctor will receive a report of your procedure
