

# A day in the life of Outpatient Allied Health

1

## GET STARTED

I view the day's appointments on a schedule or status board, and when a patient arrives, I can jump into their electronic chart.

2

## REVIEW

I review patient history, past treatment information, and up-to-date content from past clinic visits, hospital stays and ED visits - all in one place!

3

## DOCUMENT

I document assessments electronically, enabling others to see what's been done.

4

## ORDERS

When physicians enter orders directly into the system, I am able to immediately access and execute them.

5

## WRAP UP

I document my workload electronically after each clinic visit.
