

A day in the life of an Outpatient Clerical

Based on the module being utilized in your respective clinics will determine if you are using PCVS/CWS or AMB/Front Office.

GET STARTED

I view the day's appointments on a schedule, and, add additional patients to the schedule as required and requested by the health care provider.

1

2

REVIEW

I review patient history and up-to-date content from past clinic visits, future clinic visits, scheduled testing and results, hospital stays and ED visits - all in one place!

3

INTAKE

I can complete the registration of a patient, identify special indicators.

4

UPDATE

I can easily update patient demographics, complete insurance information, and Primary Care Provider information.

5

ORDERS

I can enter orders electronically on patients that have been written by a physician or nurse practitioner for Diagnostic Imaging and the Lab.

6

DOCUMENT

I complete notes and information in CWS or Front Office scheduling modules related to the patient's scheduled appointment.
